

# CP1 Piano

## Promotional Flash Memory Content for Yamaha MOXF / MOTIF XF

The CP1 Piano contains:

- 16 User Voices
- 15 User Waveforms
- 119 MB Samples (2,048 Keybanks)

This library contains the piano samples that are installed on the CP1, Yamaha's current flagship stage piano. The samples were originally recorded from a high-class full concert grand piano: The Yamaha CFIIS. They are specially adjusted for the MOXF / MOTIF XF with deep sound in the mid to lower registers and pure and gorgeous sound in the high registers. The 16 Voices give a good example on how to use this great sample library. Find your piano sound for your musical style.

Voice No.	Voice Name
USR2:A01	CF Grand
USR2:A02	CF Light
USR2:A03	CF Rock
USR2:A04	CF Dark

USR2:A15	CF Unison
USR2:A16	Old Century

### **Important note:**

By loading the All-file all current USER data in the MOXF / MOTIF XF are overwritten.

User Waveforms and Samples already stored in the Flash Memory are not overwritten.

If you haven't backed up your USER data yet, you should do so now (File Type „all“ -SAVE).
