Synth Universe – Vol. 1: „Magical Pads“

„*Synth Universe*“ offers an universe of synthesizer sounds.

Several volumes will include all important synth-categories time after time.

This first volume „Magical Pads“ provides mainly warm, analog and atmospheric synthpads, but also sweeps, swells, synthbrass, and Atmo/FX-sounds.

Magical Pads contains not only warm, analog and atmospheric synth pads, it also offers sweeps, swells, synth brass, and Atmo/FX-sounds.

Synth pads crop up in lots of synth and sample libraries but frequently they come programmed with very specific movement in them which makes them difficult to use in a professional (“less is more”) setting.

Not only are these pads are beautifully constructed, with multiple gentle, wide, fat, and spacious types, the emphasis is musicality rather as opposed to the spectacular.

The overall character of these pads is influenced by classic vintage synths such as the Jupiter-8, Oberheim Xpander or Polysix, plus new ‘virtual analog’ types such as the Nordlead or Virus.

Magical Pads usability also extends to real time control; in most cases a sound can be morphed from "bright" to "dark" using the mod wheel.

Many of the 160 Voices explore the expanded sonic possibilities of Xpanded Articulation. These Voices (tagged AF1&2) give you maximum sound flexibility, incorporating Assignable Functions (AF1 + AF2) and alternate element combinations. The cross-fade of the sounds is smooth because of element's release parameter settings.

The Motif XS Set „Magical Pads“ includes

- **160 new User-Voices**
- **35 User-Waveforms**
- **142 MB Samples**

For loading samples **Installation of optional DIMMs** (2 x 64 MB or more) is needed. But you can load alternate version without samples, if you have not DIMMs installed.

You will find the new voices in USER1 (1 – 128) and USER2 (1 – 32).

USER2 (33 – 128) also includes a collection of best pads of MOTIF XS, MOTIF ES und MO6/MO8 presets.

Loading Voices to MOTIF XS

The File PADS_XS.X0A (Type „all“) includes 160 new voices, 35 user waveforms and 148 MB Samples.

If you received the set with download or CD-ROM you have to copy this file to USB-device before loading to MOTIF XS.

After that you can load data using file-Type „all“ to MOTIF XS.
New Voices will be loaded always to USER1 (1 – 128) and USER2 (1 – 32).

You can also load single voices using file-type „voice“.

Important notes:

With loading all-files all user data of Motif XS will be overwritten (User Voices, Performances, Master, User Arpeggios, Songs, Pattern, Waveforms, Utility-Settings).
Please save your data before loading files.

You can recall Factory Voices with Factory Set (UTILITY JOB).

For loading samples installation of optional DIMMs (2 x 64 MB or more) is needed.

Additional Audio Loops

On our website www.easysounds.de you find the demosong „Magical Groove“ for this product. It includes 9 Drum- und Synthloops extracted from EASY SOUNDS CD-ROMs „Quick Phrase“ and „Mega Arpeggio“.

This Loops are shipped with this product in WAV-Format (see folder „Magical Groove Loops 130BPM“). You can use them for your productions without paying additional licenses. If you want to combine pads, atmospheres and loops in the style of the demosong, you can use the loops for starting.

WAV-Loops of CD-ROMs „Quick Phrase“ and „Mega Arpeggio“ are basically also interesting for Motif-User.

Combining Motif-Sounds with WAV-loops works best, if you load WAV-loops into external sequencer (Logic, Cubase, Ableton Live,...). There you can arrange Motif-Sounds with MIDI-Tracks and WAV-loops with Audio-tracks.

Of course you can import loops also directly to Motif (FILE – LOAD – Type Waveform). This is especially interesting, if you use the internal sequencer of Motif. For better overview in this case it is recommended to rename WAV-Files for import (shortened file-names) because Motif-files are limited to 8 character.

You will find more informations and demos about the products of our „Content Software for MIDI-/Audio Sequencer“ on www.easysounds.de (NEWS) and in PDF-Infos in folder „Magical Groove Loops 130BPM“.

Overview: WAV-Loops „Magical Groove“

File-Name	CD-ROM
MegaArp1.wav	Mega Arpeggio
MegaArp2.wav	Mega Arpeggio
MegaArp3.wav	Mega Arpeggio
MegaArp4.wav	Mega Arpeggio
MegaArp5.wav	Mega Arpeggio
MegaArp6.wav	Mega Arpeggio
QPdrm_01.wav	Quick Phrase
QPdrm_02.wav	Quick Phrase
QPdrm_03.wav	Quick Phrase

The demosong „Magical Groove“ is using following listed voices of User Voice Bank 1:

24	Atmo Swell AF1&2
23	Air Swell
38	BPFSweep 6
51	Trance Tune AF1&2
69	JP Chorus 2
108	Atmo Vox 3

111	Noizmaker 3
118	Quickmorph
121	Voltage 2
123	Atmo Fx 1
125	Hybridz 1
