

# CS80 BONUS

## Promotional Sample Memory Content for Yamaha MOTIF XF

The “CS80BONUS“ contains:

The entire original “CS-80 Library“ of:

128 User Voices (User Bank 4)

61 User Waveforms

469 MB Samples (1,179 Keybanks)

PLUS:

A group of 80 additional voices based on the original CS-80 waveforms (User bank 3) and newly voiced factory voices with new effect programming (User Bank 2)

### **Please Note:**

This file uses the samples and waveforms from the “CS-80 Library” file and has been saved in the format “Without Samples”. In order for this file to sound correctly, the original “CS-80 Library” file should be installed to flash (loaded normally) first. Then the CS80BONUS.n3.X3A file should be loaded with the FL1> parameter set to “NONE”.

Also contained in this file in “USER 2” is a group of preset voices that have been programmed with the new reverbs and amp modeling distortions that were introduced in Motif XF operating system version 1.50. Enjoy!
