Xspand your World Complete Sample Bank 1,2 and 3

Because this ALL file features almost 400 MB of new sample waveforms, you will need to have 512 MB of DIMM RAM installed in your Motif XS to load the data.

Information about included sounds in Bank 1

S90 ES Piano - The S90ES piano is one of Yamaha's most popular sampled piano sounds. The samples feature an \$700 \$250,000 hand crafted piano, which provides a spacious, warm sound perfect for intimate jazz, classical and solo piano work. Because it was designed for S90ES internal ROM, it has been looped using Yamaha's proprietary looping tools, reducing the size without minimizing its unique character.

Brass and Winds - Includes trumpets, flugelhorn, soprano, alto and tenor sax, sax sections, clarinets, oboes, harmonica, accordion and pan flutes. Many of these have multiple articulations and playing styles to take advantage of the workstation's Expanded Articulation engine, creating incredibly realistic recreations of acoustic instruments. Different mutes, sax sections, stereo brass falls, and a variety of different vibratos are all part of this collection.

Vocals and Choirs - The Vocal and Choir samples in the XS sample pack feature Scat Vocals, Gospel, and multiple choir sounds, including humming. These can be combined with the internal vocal sounds to give a stunning variety of life-like vocal articulations. The Scat Live sound has multiple voices in different velocity layers (Do, Bah, Duh, etc)

Strings - Two new ensemble strings were selected to add to the variety of ensembles available in the internal ROM.

XStras - This file also includes 150 arpeggios from the Keyfax Twiddly.Bits libraries including new guitar strumming patterns, conga patterns and drum patterns from a variety of styles. In the Pattern Mode are 16 sliced audio files taken from Sonic Reality's Groove Packs. Finally there are 20 new Performances showing off some of the new sounds.

Organs 2

Here is a new file with 16 Organ Voices using brand new samples from Yamaha Japan and the Cool organ from the Players Bank from the Motif ES CDRom. The best way to load these is to use the Mix Voice Tip - Using Mix Voices

Follow the instructions in the Mix Voice article on how to manage Mix Voices and Sample Libraries. The Song that contains the 16 Mix Voices is Song 1 - Organs 1. The Voices can also be found in User Bank 1 - Voices 1-16, but using the Mix Voice trick avoids multiple sample loads when loading one Voice at a time.

Original Motif Power Grand and Jazz Grand

This download includes the Power Grand and Jazz Grand. They are stored as Mix Voices on Parts 1 and 2 in Song One. Check the guide on using Mix Voices for instructions on how to load the file and store a Mix Voice to a User Voice location.

NEW SESSION and GOTCHANODDIN' DRUMKITS

Here is a new All file that includes a new Yamaha Oak Custom kit, a new Power kit and also Latin, World and Indian Percussion kits.

We also included some HipHop and Uk Dance Drumkits from our friends at Gotcha Noddin'.com.

We recommend using the Voice Load function (not ALL or ALL Voice) to load the drum kits on this file as you really only need the User DrumKits (the User Voices are simply copies of the internal Factory data).

Back up any User Drum Kits you have created, Select Voice as the File Type, Select User Drums as the Source and then Select all so you load all the User Drumkits together.
