IMPORTANT NOTES:

* Voices are used in Performance. Some of these voices are meant for blending, so the voice alone may **not sound the same** as the voice when it's blended in performance.

These sounds were created using a Yamaha Motif ES7, a Mackie mixer, and KRK V6 studio monitors. Your equipment, playing style, note choice, voicing, room, and other factors contribute to the sounds. So, please feel free to TWEAK AWAY!!!

Two things you should be aware of: (1) you can always reduce reverb/effects by simply editing in the Effects page. The amount of effects on these sounds may not be what you want to use live (sometimes less reverb live is better). Use your ears!!! (2) You can editing global EQ quickly using the knobs on the upper left of the keyboard panel. If you need to make quick adjustments, this is a great place to start!

THIS PAGE, AND ALL SOUNDS, ARE COPYRIGHT 2007 RICHARD PEARL and/or PLAYKEYZ. All rights are reserved. No claim of affiliation is made with respect to Yamaha Corporation, any of its affiliates, or any artists or their affiliates.
