SongWriters Collection is sonorous, colorful and highly playable sounds that are especially suited for songwriting in music genres of rock, R & B, folk, pop, jazz, new age and film music.

The sounds are created in series, so that different versions of a sound may lie after another - but each with their own expression and mood, and often with new layers or effects added. A few of the sounds are modifications of Motif XS/MOX preset voices, but most are new unique sounds.

All sounds are programmed with specific controller settings for the ASSIGNABLE FUNCTION buttons 1 and 2. And typically, there will also be controller settings for the modulation wheel. This pre-programming allows you to add various twists and tonal characters changes to the basic sounds. On the following pages you will find a data list of the 384 voices in the 3 User Banks.

About the creator of the sounds

My name is Per Skovgaard, I live in Denmark and for 37 years I've had a passion for creating new sounds and soundscapes on a synthesizer - funky, rocking, expressive and always evocative voices, which I myself think is a dream to play on.

When I create voices, I always do it in series. Instead of just picking one sound from each series, I have chosen to give you all the best sounds from the series.

Much energy and many hundred hours of effort are put into creating the *Songwriters Collection* soundset, so I hope it will be useful and inspiring for you. Enjoy using the voices!
